## II. REMARKS

The amendments to the Specification correct inadvertent errors and omissions. No new matter is added.

The original claim 154 contains the term "first sequence" which has no antecedent in its parent claim. In amended claim 154 the term is replaced with "particular sequence" which does have an antecedent in its parent claim.

Claim 204 is new.

Each of the new and amended claims reads on the elected species. No new matter is added.
